

SCANDINAVIAN STONE

quality by nature

Natural stone products are used successfully in many sectors and for each area it often exists specific requirements. As a quarry company we take responsibility for all block stone we sell as described in our quality class and dimension document.

The technical data to our products is issued after test at external test institute.

We have used as base for mechanical properties finished products coming from a manufacturer of natural stone products. These values shall be seen, as indicative values and a different producer may depending on manufacturing methods, experience other values. Being a natural product, some variation e.g. in colour of natural stone is normal.

We, therefore, recommend that you carry out your own tests in each case, to confirm that the product which you envisage using is appropriate for your particular application. All information and recommendations are given by us in good faith, on the basis of practical experience, but without warranty. The technical values are from a single sample and not statistically secured. We do not assume any responsibility for the quality of any finished product made by other producers.
